Penn State Cooperative Extension has been providing statewide leadership on the opportunities and challenges arising from Marcellus Shale, having conducted our first Marcellus training workshops in 2001. We have been working with state agencies, numerous local governments and local government associations, environmental groups, landowners, workforce development groups, and others.

Your Business and Marcellus Shale: Voices of Experience

8:00 am - 9:30 am
Jan 27, Feb 3, 10, 17

NTRPDC
312 MAIN STREET
TOWANDA, PA 18848

Pennsylvania is sitting on top of a giant economic engine.

Is your business or community poised to profit?

The hottest natural gas boom in the world is right here. The Marcellus shale formation is driving energy firms to Pennsylvania, and the influx of dollars is creating significant business opportunities with natural gas and service companies, supporting businesses and worker spending. Plus, the spending from lease and royalty payments promises to ripple through our economy for years to come.

Is your business or community poised to profit from gas boom activity?

Turn “no” into “yes.” Join other local businesses and communities for a four-part Webinar series presented by The Northern Tier Regional Planning & Development Commission and Penn State Extension education. Get valuable information and insights that will help you understand, explore and take advantage of business opportunities arising from the Marcellus shale.

Topics*

- Local Business Success Stories and Lessons Learned I
- Working with the Industry: Natural Gas Company Perspectives
- Local Business Success Stories, and Lessons Learned II
- Partnering; Industry and Local Business Panel

** In the order they will be presented*

Convenient early bird sessions start before your business day begins.

Sessions are scheduled for 8:00 to 9:30 a.m. on Jan 27, Feb 3, 10, 17.

Learn from the experts.

Penn State Extension conducted the first Marcellus educational training workshops in 2001—long before the Marcellus shale potential was fully recognized. Since then, we’ve been working with landowners, state agencies, local governments and local government associations, environmental groups, workforce development groups, and others.

Our only goal is to provide fact-based information to help Pennsylvanians make informed decisions.

Don’t miss out!

Marcellus shale development is expected to create tens of thousands of Pennsylvania jobs by 2010 and pump \$14.17 billion into our state’s economy, according to a recent study.
